| Status | President | | |
| Affiliations | Society of Chemical Engineering of Japan, Association of Product Development and Management, Japan Society for Intellectual Production | | |
| Keywords | Highly Viscous Liquid, Gas-Liquid Mixing, Liquid-Liquid Mixing, Solid-Liquid Mixing, Chaotic Mixing / Leadership Model, Marketing, Sales Strategy | | |
| Technical Support Skills | Mixing Technology, Management Engineering, Environment Engineering, Community Development | | |

Research Contents

【Mixing Engineering】

Most daily necessities are made from liquid substances. Thus, the state of liquid mixing affects the properties of goods. The design of mixing equipment and its optimum control are investigated.

【Management of Technology】

In the small manufacturing industries or the service ones (especially tourist ones), the leadership model, the marketing and the sales strategy are missing. The subjects concerned with these items to be understood for the managers in these industries have been investigated.
