

## Research for active fault

<b>Name</b>	SAWA Hiroshi	<b>E-mail</b>	sawa@tsuruoka-nct.ac.jp
<b>Status</b>	Professor		
<b>Affiliations</b>	Japanese Society for Active Fault Studies, Seismological Society of Japan, Association of Japanese Geographers, Tokyo Geographical Society		
<b>Keywords</b>	Active fault, Tectonic landform, Earthquake, Tectonic geomorphology, Geology		
<b>Technical Support Skills</b>	<ul style="list-style-type: none"> <li>• Tectonic geomorphological survey.</li> <li>• Lecture on earth science.</li> </ul>		

### Research Contents **Research for active fault**

My speciality is earth science. Especially I am interested in the active fault. I have the experience which participated in the project of the government for active fault research in Japan. To a student, I can train a field survey and an interpretation of aerial photographs.

Procedures of my study are as follows;

- 1) aerial photo analysis and fieldsurveys,
- 2) mapping of geomorphic surfaces and reconstruction of geomorphic evolution,
- 3) mapping of tectonic landforms which explain the geomorphic evolution reasonably.
